Product Guide

How to Use

Lock & Load

The PITRON™ is the ideal size for TRONPODs™ and is also compatible with other 510 threaded cartridges. The PITRON™ can fit any 510 threaded cartridge, but for best fit we recommend a cartridge size of 10.5 mm in diameter.

To connect your oil cartridge to the PITRON™ battery, screw your 510 threaded cartridge directly into the threads of the PITRON™.

Press Play

To activate the PITRON™ with an oil cartridge, directly inhale from the cartridge to activate the battery. The LED indicator on the bottom of the battery will illuminate to indicate when the battery is being activated and vapor is being produced. PITRON™ will allow a maximum draw duration of 10 seconds.

How to Use

Power Up

To charge your PITRON™, plug the included micro-USB cable into the micro-USB port on the bottom of the PITRON™ battery and plug the other end into a wall adapter or computer. The LED indicator will illuminate to let you know the device is charging. When the LED indicator turns off, the unit is fully charged. Remove the cable and resume use.

Warnings

- Keep the PITRON™ and its components out of reach from children and pets.
- Do not store near heat sources.
- Do not expose to extreme temperatures.
- Do not open or touch internal parts when powered on, when hot, or in use.
- Do not disassemble or tamper with the internal components.
- Do not use if damaged or broken.
- Do not operate in an unusual manner.
- Do not use any damaged equipment to charge the device (including damaged adapters, anything with frayed wires, etc.).
- Do not use the PITRON™ if it becomes immersed in any liquid.
- Do not bend or damage the charger area.
- Do not use a fast charger or a charger with non-standard voltage and current ratings. Use a charge adapter with the rating $5V \approx 1A$.
- Do not place on surfaces that insulate

the temperature build-up of the unit from dissipating (do not charge while placing the unit on beds, couches, pillows, clothing, etc.).

Disclaimer

The PITRON™ is not a medical device and cannot diagnose, treat, or cure any illness or medical condition. If you have health problems, consult a physician before using the PITRON™. The PITRON™ is not intended to be used with any illegal, medicinal, or unregulated substances. Any improper or illegal use of this product will void the limited warranty. The PITRON™ is not a smoking cessation device.

Warranty

TRONIAN™ adheres to strict quality control standards and only offers high-quality products that are vigorously tested. In case of quality impairments or defects of TRONIAN™ products, the following warranty conditions apply.

Limited Warranty

The PITRON™ has a twelve (12) month limited warranty on the hardware and is guaranteed against defects in materials and workmanship. To verify the date of retail purchase by the original customer, a proof of purchase is required from a sanctioned retailer. At its discretion and to the extent permitted by law, Thermodyne Systems (TRONIAN™) will exchange the product with a product that is new, refurbished or is a functionally equivalent

product, if the product develops any mechanical defects and a claim is filed within the warranty period. The warranty period starts from the date of retail purchase and does not restart after a warranty claim has been issued.

All products submitted for warranty become the property of TRONIAN™. The customer covers the shipping costs for warranty support. If you have issues with your product, send an email to info@tronian.com and a customer service representative will contact you as early as possible to resolve the issue and find the best solution.

Warranty

Exclusions and Limitations

The limited warranty only applies to devices manufactured by Thermodyne Systems (TRONIAN™) that can be identified by the “TRONIAN” trademark, trade name, or logo affixed to them and were purchased at an authorized retailer who is fulfilled by an authorized distributor.

The limited warranty does not apply to:

- Normal performance degradation of materials, parts vulnerable to wear and tear, natural battery degradation, any arising damages due to the user's neglect, or any inappropriate use
- Any case in which the internal components of the product are purposely dismantled, tampered, or accessed in any fashion
- A part or product that has been altered to modify capability or functionality

- Damage caused by use of fast chargers or any charger with non-standard voltage and current ratings; Thermodyne Systems recommends to use a charger with the rating $5V \approx 1A$
- Damage caused by the use of the product outside the intended function as described by TRONIAN™
- Damage resulting from non-adherence with the instruction manual
- Aesthetic damage, including but not restricted to dents, scratches, deformity, and parts broken through product usage
- Damage caused by abuse, misuse, accident, flood, fire, earthquake, or other external causes

The lithium-ion battery is under warranty for a period of three (3) months from the date of retail purchase and is protected from any abnormal defects, which are not deemed as natural battery degradation.

Please note that the software pre-installed on the device and/or later iterations through updates or upgrade is licensed to you, not sold and for use as part of the product only.

The limited warranty is non-transferable and only applies to the original purchaser. If you have purchased through a 3rd party reseller such as eBay, Kijiji, Craigslist, or any other unauthorized retailer, then the limited warranty does not apply. TRONIAN™ warranties only apply to products purchased at any authorized retailer fulfilled by an authorized TRONIAN™ distributor. For inquiries pertaining to authorized retailers, please contact us.

Return Policy

Please research the product you are interested in before purchasing. Refunds can only be considered for new, unused, and unopened products at the discretion and under the terms of the authorized retailer. Refund details and terms differ for each authorized retailer and must be acquired from their customer support or website. No refund can be made if the tamper-proof seal is broken or the plastic film is damaged or removed. Products purchased through an unauthorized retailer are non-refundable from TRONIAN™.

Counterfeiting

Our long-term commitment to combat unauthorized sales and counterfeiting is to ensure the quality of services from TRONIAN™. TRONIAN™ is devoted to ensuring that our clients get the brand's up-to-date technologies, attractive form, and top-tier assistance.

TRONIAN™ warns consumers to be prudent when purchasing TRONIAN™ products from unauthorized suppliers as the quality, dependability, and safety of these products are unknown and, in some cases, can expose the consumer to hazards that do not occur with genuine TRONIAN™ products.

TRONIAN™ has a devoted team that actively tracks and inspects unauthorized suppliers and counterfeiters to safeguard clients and business partners. Because many people do not comprehend the worldwide influence of counterfeiting or the cycle of harm they assist when

buying counterfeit goods. By discovering counterfeiters and facilitating legal action against these entities, we believe we are doing our part.

While TRONIAN™ is dedicated to aiding victims of counterfeiting, we cannot refund money used to purchase infringing products, as these products were not bought from TRONIAN™, neither can we help in resolving disputes, including support through PayPal or credit card refunds.

Contact TRONIAN™ support to discover more about authorized suppliers, as any product purchased outside of our exclusive sales network has a chance of being counterfeit and is not protected under our warranty.

Recycling

The PITRON™ holds a lithium-ion battery and should be recycled and disposed of in accordance with local requirements to prevent potential harm to the environment and to human health.

Certification

MARKINGS:

CERTIFICATE: Federal Communications Commission

STATEMENT: This device complies with Part 15 of the FCC Rules. Operation conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

MARKINGS:

CERTIFICATE: Conformité Européenne (European Conformity)

STATEMENT: This device conforms with health, safety, and environmental protection standards for products sold within the European Economic Area.

Certification

MARKINGS:

CERTIFICATE: Waste Electrical and Electronic Equipment Directive (WEEE Directive)

STATEMENT: This device is considered an electrical or electronic waste and should not be treated as household waste. The device should be disposed of through an established municipal collection point for WEEE.

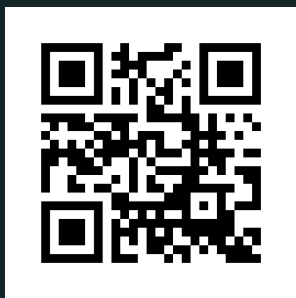

MARKINGS:

CERTIFICATE: Restriction of Hazardous Substances in Electronic Equipment

STATEMENT: This device complies with the regulations and restrictions of RoHS.
